(c) and (d) Although globalisation has exposed the Indian SSI sector to greater competition, the sector has resilience to withstand competition. The Government is constantly monitoring the impact of globalisation and WTO arrangements on the economy including the SSIs and has put in several measures to safeguard the interest of domestic industry and to make them competitive both domestically and globally. These include special focus on areas such as technology upgradation, infrastructure assistance through cluster approach, enhanced fiscal support, timely availability of credit, adoption of modern management facilities, use of electronic infrastructure and other IT applications to face the emerging challenges of trade liberalisation. Protection to these industries is available in the form of raising customs duties up to the bound levels, imposing anti-dumping duties and countervailing duties, taking safeguard measures in case of surge in imports etc. An inter-ministerial group under the chairmanship of Commerce Secretary has been constituted to assess the impact of removal of quantitative restrictions and suggest suitable corrective measures. A comprehensive policy package for the promotion and development of small scale industries and to enhance its competitiveness, both domestically and globally, was announced by the Prime Minister on 30th August, 2000. The policy package consists of enhanced fiscal and credit support, better infrastructure and marketing facilities and incentives for technology development.

Relief to SSI from BIFR
